East Butler, PA 16029

## DETENTION & CONTAINMENT

---

Maximum security for detention and containment areas.

## Our Products:

Secur-Tem + Poly® products combine the abrasion resistance of glass with the impact resistance of polycarbonate.

Lexgard® laminated polycarbonates are designed for extensive physical attack combined with ballistic performance.

Lexgard® laminated polycarbonates can be manufactured as Air-Gap(AG) units combining low-maintenance laminated glass with the impact resistance of laminated polycarbonate.

Ultimax and INFERNOGARD® fire-rated and fire-resistive options combine fire protection, tested and listed by Underwriters Laboratories (UL), with a wide range of laminated security glazing solutions for both forced-entry and ballistic protection.

## About Us

We provide a full spectrum of glass products and solutions for applications including correctional facilities, courthouses, and government security buildings. Our products are crafted using the most durable materials and state-of-the-art engineering techniques to withstand extreme physical assaults, ensuring both the safety of staff and the secure containment of individuals.
