

Helping to Keep Commercial & Residential Properties Safer

ACCESSGARD® security glazing is laminated glass constructed with a state-of-the-art proprietary material that is built to withstand extensive physical attack during a forced-entry scenario. It provides the aesthetics and daylighting advantages of glass, with an additional level of security.

ACCESSGARD®

The Ideal Solution For Protecting
Commercial & Residential Properties

Benefits:

- Tested to nationally recognized detention standards—ASTM F1233-08
- Meets safety glazing standards
- Installed following industry guidelines, no need for licensed installers
- Can be installed in industry standard doors, framing, as well as window and curtain wall systems
- For retrofit or new construction
- Provides security while optimizing daylight

Versatile Glass Options

Choose from tinted, reflective, Low-E, insulated, or fire-rated glass options to meet both performance and architectural needs—without sacrificing the strength of the underlying security system. Unlike metal grilles or bars, ACCESSGARD® preserves the open, transparent feel of glass, supporting natural light, visibility, and clean design while enhancing occupant comfort.
