

# LEXGARD®

## High-Performance Security Glazing for Demanding Environments

### When Glass Isn't Enough

In environments where safety, durability, and reliability matter most, traditional glass can become a liability. LEXGARD® is engineered to perform where standard glazing fails—providing exceptional resistance to repeated impact, forced entry, and high-abuse conditions.

### Why LEXGARD®

- Designed to withstand repeated impact and abuse
- Helps prevent forced entry and containment breaches
- Maintains clear visibility for supervision and safety
- Lightweight for easier handling and installation
- Ideal for retrofit and new construction applications

LEXGARD® is a performance solution for environments where safety, durability, and long-term reliability matter most.

### LEXGARD® Applications

- Detention & Correctional Facilities
- Law Enforcement & Government Buildings
- Behavioral Health & Healthcare Facilities
- Secure Interior Spaces
- Schools & Institutional Buildings

### Standard Glass vs. LEXGARD®

#### IMPACT RESISTANCE

- Standard: Low (can break)
- LEXGARD®: High (repeated impact)

#### MAINTENANCE

- Standard: Requires replacement
- LEXGARD®: Built for durability

#### SAFETY OUTCOME

- Standard: Manages failure
- LEXGARD®: Prevents failure
