

Protection Without Compromise

LEXGARD® laminated polycarbonate glazing is engineered for high-security applications that require safety, durability, and long-term performance. Its multi-layer construction provides exceptional resistance to impact, forced entry, and ballistic threats while maintaining the clarity and daylighting benefits of glass.

Ideal for retrofit and new construction in detention, government, education, healthcare, and other high-security facilities.

LEXGARD®

High-Performance Security Glazing
for Demanding Environments

Benefits:

- Superior impact resistance
- Forced-entry protection
- Ballistic-resistant options available
- Exceptional optical clarity
- Lightweight for easier installation
- Ideal for retrofit or new construction
- Durable, low-maintenance performance

When Glass Isn't Enough

LEXGARD® is trusted in facilities where security and visibility are equally important, including detention and correctional facilities, courthouses, government buildings, law enforcement facilities, schools, healthcare environments, and other critical infrastructure.

Available in multiple configurations and threat levels, LEXGARD® integrates seamlessly into new or existing glazing systems to meet a wide range of security requirements.
