

## Engineered for Resilience

Secur-Lite® utilizes advanced glass laminates to provide a clear, durable barrier that meets stringent UL 972 standards. It provides the aesthetics and daylighting advantages of glass with an additional level of security. Whether for high-end residential entryways or retail storefronts, Secur-Lite® is the essential security solution for buildings requiring a robust defense against physical assault.

## Secur-Lite®

Laminated glass products engineered for exceptional protection against physical attacks and burglary.

## Benefits:

- Smash-and-Grab Defense: Ideal for high-value retail environments like jewelry stores and luxury boutiques.
- Seamless Integration: Fits industry-standard doors, framing, windows, and curtain wall systems.
- Ease of Installation: Installed following standard industry guidelines—no specialized licensed installers required.
- Design Flexibility: Can be used in retrofit or new construction to provide security while optimizing natural daylight.

## Versatile Glass Options

Choose from tinted, reflective, Low-E, or insulated glass options to meet both performance and architectural needs—without sacrificing the strength of the underlying security system. Unlike metal grilles or bars, Secur-Lite® preserves the open, transparent feel of glass, supporting natural light, visibility, and clean design while enhancing occupant comfort.
